

My personal experiences while studying abroad at Mykolas Romeris University

(Lithuania)

General Information of my arrival to the airport tell the first step in the study:

Reception conditions on arrival: where were welcoming me by my friend at the airport and she took me to the flat which i rent it and gave me all the information about the transportation in the city and how to go to the university and the markets and the means points of interest in the city. In the next day we went early together to the University and we toured in the facilities of the University and she showed me the lecture halls and the cafeteria and library and passed Hall of sport, then we went to the International Office, where I met official of the section and completed the procedures documentary and she give me cards that belong to the students as an reduction in transportation, and card reduction of the cafeteria and entry card library and create an account for me on the internet I can access the Internet and access to important information for students lectures as a venue and dates and the names of professors and study periods and holidays, and the choice of materials and the dates of exams and other important information provided by the website.

Living conditions:

For my case as a mother I will to talk about how can I get good flat to rent because I was thinking to decide the best choice and i really get what I'm looking for. The flat was it in amazing area that surrounded with cafes and many places for intersegment

Spicily for my children, they were happy and suitable for a family and also the flat was it just 5 minute walk of the university.

Otherwise the location of the flat and the university provide a very good condition of shopping and kinder garden and about the cost was reasonable for all these facilities.

University academic system:

The university system is very interesting and very flexible in terms that the system of study provides the student a long list of courses that students can be chosen and join them as he does not have any compulsory courses and student is free to choose courses that he wants and is

consistent with, and the exams system is very flexible that the system provides the students the possibility of passing the exams in several forms such as the preparation of research papers or to provide for presentation or through a written exam, I would also like to point out to the crew outstanding education that available in the university, which consists of a group of professors and diplomats and legal experts who imparts to study more of a thrill.

Entertainment system in the university:

There are many recreational activities in the university and entertainment for students through the establishment of recreational and sports competitions and the organization of concerts and celebrations and cooking contest for students and sing and dance and provide trips and camps for students inside and outside Lithuania and organizing festivals and sports competitions.
