

Symbiosis International University in Pune, India

India has been the most beautiful experience in my life so far.

The first time in India was very heavy. Although I was well prepared, I had a huge culture shock in the first weeks .

I 'm especially a month earlier to India to travel.

Unfortunately it did not work because the registry has lasted 3 weeks.

The college had not started yet and I could not get to know students.

So I spent the first month in Pune.

The uni was completely different than in Germany, small classes, younger students , and others way to study .

The international office has most worked well.

Especially the Economics institute was always friendly and helpful.

Of course time for traveling remained.

Goa , Kerala , Hampi , Jodphur , Jaipur , Jaisalma , Pushkar , Agra and much more.

I would advise anyone to make this semester abroad.

It was completely different but beautiful.
