Kommentar

Mrs. Conny Helbling-Roberts [MSc, BA (Hons), CELTA – UK] - Coach for International and Intercultural Communication - will provide an intensive coaching workshop (10 participants, 36 hours, 6 dates) for young natural scientists who have solid experience in the delivery of scientific presentations.

With the increasing application of English as the *lingua franca* of international conferences and congresses, the scientific community is now expected to communicate in English with a degree of eloquence and sophistication. This workshop is designed for those who wish to polish their oral communication skills (presentations, discussions, meetings) encompassing cultural and linguistic idiosyncrasies. The objective of the workshop is to increase the spontaneity and naturalness of scientific discourse in academia.

The workshop focuses on practical rehearsals which are accompanied by purposeful and constructive feedback from the coach and the peer group.

Central issues:

Principles of presentation techniques and conventions (overview) Language and strategies for international meetings and discussions (diplomatic language, conventions, communication patterns)

Highlights:

Individual research presentations (20 min/participant) Discussing scientific results (10 min / presentation) Simulations (e.g. meeting role plays, group discussions) Continuous performance assessment and comprehensive feedback (inclusively: 30 min coach and peer feedback for each research presentation!) Analysis and evaluation of content and delivery, intonation, body language, pace, visual aids and language performance

Bemerkung

Please note:

Participants are required to prepare their presentations before the workshop commences and are expected to attend all workshop sessions. The presentations should be relevant to the scientific work of the participants and portrait recent or future research projects or research papers.

Open Class: Strategies for Writing Scientific Papers (C1)

80004, Seminar/Sprachpraxis/Sprachpraktische Übung

Reid, Joy

Fr wöchentl. 09:00 - 12:00 03.10.2014 - 31.10.2014 3110 - 014

Bemerkung Registration: online

Please, specify your dates of participation in the registration form

http://www.granat.uni-hannover.de/openclass_scientific_writing.html

This flexible, weekly class aims to cater to the individual needs of doctoral students who are writing scientific journal articles. Dr. rer. nat. Joy Reid (Coordinator of English for Natural Sciences, LUH Fachsprachenzentrum) and her language assistants offer individual feedback, clarification and tools to improve and accelerate paper production. Participants can define their own course schedule throughout the year by booking the dates that suit them best. After attending ten sessions (30 hours, 10 dates), a course certificate is issued.

Class time: Fridays (throughout the hole year), 9am-12noon

Location: Building 3110, Room 012 (Seminarraum des FSZ im Erdgeschoss der Mensa, Callinstraße 23, 30167 Hannover)

Language prerequisites: Minimum B2 (see Common European Framework)
